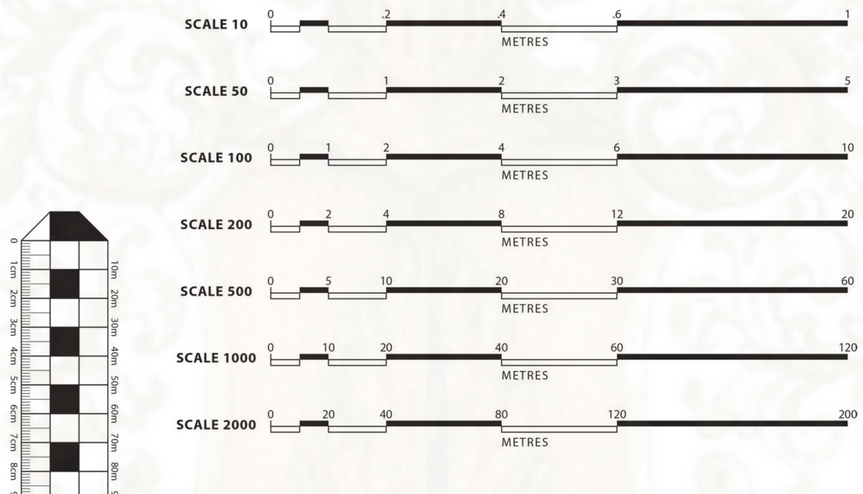
Design Note

This draft establishes the foundational structural shell and geometric parti of the Arcane School and/or Universal Sanctuary. The form is monolithic and cellular, with individual chambers generating resonance within sacred geometry. The architecture is defined by intrinsic spatial logic.

Doors, windows, fenestration, material transitions, and structural articulation (primary ribs, buttressing, load paths) will be developed in later phases. The current focus is the fundamental geometry and spatial organization as the generative framework.



SCALE EXAMPLES - NOT LIMITED TO DESIGN

All structures and nodes are conceived with infinitum potentia. - scale;
